

User Instructions for Using 5ml Ready D F A CMB Pocket (sample Sale Pack) dt 03 02 24

This 5ml Ready D F A CMB Pocket , ready to use, Dry Feed Additive. This can be directly added with 5 litres of water. Take 5 litres well water or tap water in a 8 or 10 litres well dried bucket. Add this 5ml ready DFA and mix by hand 2 times only. Now DFA + Water mix is ready. This 5 litres can be given to 1 Cow for 7 days. Take a plastic mug marked 700ml, and keep it inside this bucket (always). Always close the bucket with lid or with any thick cardboard available. This can be kept in a corner inside the Cow shed. Water cannot touch this 5 liters D F A + water mix, so make sure it is kept in a covered area, protected from rain and direct sunlight.

See Video at: <https://youtu.be/kz6JyZ0NrLU>

Take about 250~300 grams natural Cow dry feed (rice bran + wheat bran + dhal husk) (Pottu + Thavidu in tamil) in a wide big vessel . Take 700ml DFA Water mix and add with this dry feed, mix by hand 8 or 10 times, then give to one Cow. Cow will eat this feed happily.

Do not give this along with main food. Give It in between main food, 3 hours after or before main food i.e between 12 noon to 2 P m . See Video at :

<https://youtu.be/uIspIgkgVka>

Do's: You can give to milking Cows or Buffalos.

Don'ts: 1. Do not use a wet bucket for preparing DFA + Water mix. Use always well dried bucket. 2. Only give this, to milking Cows, between 1 month after giving birth to new Calf or with in six months, to know the exact increase in milk. 3. Do not mix this more than 2 times, after adding 5ml DFA with 5 litres water. 4. Give this added with only natural Cow feed, not with packaged feeds.
