

User Instructions for Using 6ml Ready D F A C CMB Pocket (sample Sale Pack) dt 02 04 24

This 6ml DFA C CMB Pocket is a Concentrate. This can be added with 6 litres of water to make 6 litres Ready Dry Feed Additive. Take 6 litres well water or tap water in a 9 or 10 litres well dried bucket. Shake this pocket once. Cut it on top. Add this 6ml DFAC to 6 litres water, and mix by hand 2 times only. Now DFA + Water mix is ready. This 6 litres can be given to 1 Cow for 10 days at 600ml per day. Take a plastic mug marked 600ml, and keep it inside this bucket (always). Always close the bucket with lid or with any thick cardboard available. This can be kept in a corner inside the Cow shed. Water cannot touch this 6 liters D F A + water mix, so make sure it is kept in a covered area, protected from rain and direct sunlight.

See Video at: <https://dinlog.in/englishdfac.html>

Take about 250~300 grams natural (not packaged feed) Cow dry feed (rice bran + wheat bran + dhal husk) (Pottu + Thavidu in tamil) in a wide big vessel . Take 600ml DFA Water mix and add with this dry feed, mix by hand 4 or 5 times, then give to one Cow. Cow will eat this feed happily. Do not give this along with main food. Give It in between main food, 3 hours after or before main food (between 12 to 2 pm) See Video at: <https://dinlog.in/englishdfac.html>

Do's: You can give to milking Cows or Buffalos.

Don'ts: 1. Do not use a wet bucket for preparing DFA + Water mix. Use always well dried bucket. 2. Only give this, to milking Cows, between 1 month after giving birth to new Calf or with in six months, to know the exact increase in milk. 3. Do not mix this more than 2 times, after adding 6ml DFA with 6 litres water. 4. Do not give mixed with packaged Cow Feed. Give with natural Cow feed only.
