

Dinlog NX Nilvembu Powder

(This is a Food Supplement for Diabetic Persons only)

How to make 50ml Nilvembu Water: Pour about 50ml good mineral water (up to the 50ml marked level) into the PET bottle. Tap Capsule bottom a few times, open top Cap and gently pour the 0.15 gram NX Nilvembu powder into the 50ml water inside PET bottle. Close bottle Cap tightly, and shake the bottle up and down 12 times only, so the Nilvembu powder mixes well with water. See video given.

Benefits: This Nilvembu is a very good Food supplement for Diabetic Persons. Reduces high blood sugar levels (above 300mg/dl) quickly & effectively. Much more effective than Bazaar Nilvembu Powder. Improves immunity. Not recommended for pregnant women.

Daily Dosages for Diabetic Persons only: (Only once a day): Low: 1ml. Medium 1.5ml; High 2ml. Drink directly, 15~30 minutes before food. Also drink half a glass water after that. **Note:** Take this 1 hour before or after taking other medicines. Or take once a day at anytime. Works well for persons taking Allopathic medicines, not for those taking other herbal or Ayush medicines. **Note:** Take your regular tablets/Insulin and additionally take this also. Reduce dosage of your other tablets or Insulin as sugar levels falls. **Note:** Shake bottle once before taking out content. Use 2ml Spoon given along with this bottle. Half spoon is 1ml. Full spoon is 2ml. 3/4th spoon is 1.5ml. Lower dosages works best. Avoid excess dosages.

Contents: 0.15 grams Nilvembu Powder (Inside Capsule)
